SUMMARY

Senior Software Engineer with 5+ years of experience building event-driven microservices in Java 21 and Spring Boot. Developed 4 of 20+ services end to end on a real-time payments platform (FAST and PayNow, ISO 20022) for a major international bank. Earlier created client-facing data integration and analytics products at Kaiburr. Experienced in idempotent, fault-tolerant design, CI/CD and Kubernetes on GCP.

PROFESSIONAL EXPERIENCE

Software Engineer | [P8.io](https://p8.io) (Contract for ANZ Bank) | Remote

Jul 2025 - Sep 2026

- Served as core developer on a real-time fast payments platform (FAST and PayNow) comprising **20+ event-driven microservices**, using Java 21 and Spring Boot; designed, built and owned **4 of the services**.
- Implemented 3 payment flows (inward credit transfer, inward direct debit, outward credit transfer) as services, integrating with external clearing infrastructure over IBM MQ (ActiveMQ for local development) and with internal services over Kafka.
- Handled **ISO 20022 messages**: pacs.002 status reports for incoming pacs.008, pacs.007 and pacs.003 messages; camt.029 responses to camt.056 recall requests; outgoing pacs.008 payments; admn.001-004 administrative messages; and system notification messages (SNM).
- Engineered retries, idempotency, duplicate handling and reconciliation across all message types, with monitoring and alerting for multiple failure scenarios.
- Validated resilience with Byteman failure-and-recovery tests on **3 critical points** (Kafka, Spanner, IBM MQ) and JMeter performance tests; resolved SonarQube, Black Duck, Checkmarx and Twistlock findings; supported **production go-live** and incidents.
- Reviewed 50+ pull requests, contributed to design discussions, helped a new team member get set up, and partnered directly with clients, business analysts and QA.

Software Engineer | Kaiburr | Remote

Jun 2022 - Jun 2025

- Designed and built Quarkus microservices and **20+ collectors** that pull data from third-party tools (Jira, Azure DevOps, Checkmarx and others) over REST and GraphQL APIs, using Swagger Codegen and mapping the data to a canonical model stored in MongoDB.
- Delivered the **Quality Engineering Dashboard**, using Groovy scripts to calculate 10 metrics and KPIs behind dashboard charts and tables, and **verified results** before client delivery.
- Consolidated data from **4 security tools** (including Checkmarx and Twistlock) into unified vulnerability KPIs.
- Gathered requirements directly from clients, held weekly dashboard reviews, and onboarded clients onto Keycloak.
- Released versions through Jenkins CI/CD pipelines with SonarQube quality gates, deploying containerized services on Kubernetes.

Intern | Olam Information Services | Chennai

Aug 2021 - May 2022

- Led a proof of concept for centralized configuration with **Spring Cloud Config** across 3 environments (dev, UAT, non-prod); adopted by 2 teams.
- Analyzed and validated a Keycloak version migration using Spring Boot to maintain reliable user authentication.
- Introduced springdoc-openapi with Spring Boot Actuator to auto-generate **OpenAPI 3.0** documentation for all microservice endpoints; adopted by 3 teams.

Assistant System Engineer | Tata Consultancy Services | Chennai

May 2019 - Aug 2020

- Implemented a lost or stolen card feature in a banking web application, where one user action calls an API to mark the card as blocked; created front-end modules using JavaServer Faces (JSF) in an Agile team with Jira tracking.
- Tested APIs with Postman and optimized user workflows to reduce API failures and improve user experience.

EDUCATION

Master of Technology, Artificial Intelligence and Machine Learning | CGPA: 8.04/10

2020 - 2022

Vellore Institute of Technology | Vellore

Bachelor of Engineering, Computer Science and Engineering | CGPA: 7.28/10

2015 - 2019

Rajalakshmi Engineering College | Chennai

CERTIFICATION

Spring Framework Master Class - Java Spring the Modern Way | Udemy | [UC-8bc0877c-1110-4555-a25c-b60073cacc9d](https://www.udacity.com/course/uc-8bc0877c-1110-4555-a25c-b60073cacc9d)

2022

Neural Networks and Deep Learning | Coursera | [VXGLHA7WLN4](https://www.coursera.org/verify/VXGLHA7WLN4)

2022

Architecting with Google Kubernetes Engine: Foundations | Coursera | [2Q2N2AS5AM3S](https://www.coursera.org/verify/2Q2N2AS5AM3S)

2021

SKILLS

Languages and Frameworks: Java 21, Groovy, Python, C++, Spring Boot, Spring Cloud Config, Quarkus, JavaServer Faces (JSF), REST, GraphQL, Swagger/OpenAPI, springdoc-openapi; **Messaging and Data:** Kafka, IBM MQ, ActiveMQ, ISO 20022, FAST, PayNow, Google Cloud Spanner, Firestore, MongoDB, MySQL; **Cloud and DevOps:** GCP (GKE, Spanner, Firestore), Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Linux (Ubuntu); **Testing and Security:** JUnit 5, JMeter, Byteman, Postman, SonarQube, Black Duck, Checkmarx, Twistlock, Keycloak; **Tools and Core:** Dynatrace, GitHub, Jira, Azure DevOps, GitHub Copilot, Data Structures and Algorithms, OOP, Microservices Design, Agile/SDLC, Event-Driven Architecture
